GERMANY

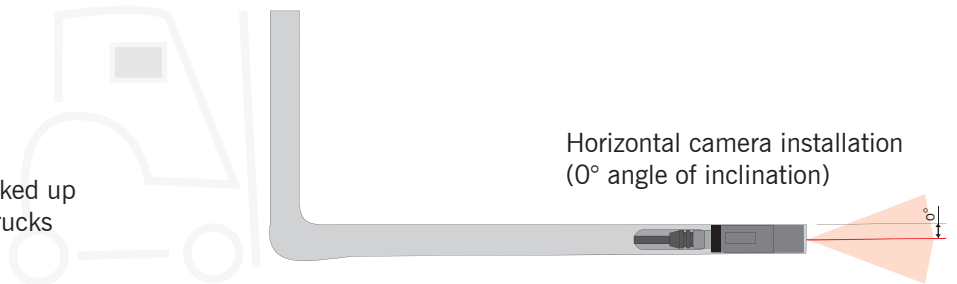

## SmartFork® Camera

Forks with integrated cylinder camera,  
lens with a 0° angle of inclination

### YOUR BENEFITS:

- ▶ Extension of your field of vision
- ▶ Sighting of carriers
- ▶ Safe loading
- ▶ Detecting obstacles when the load is picked up
- ▶ For use on counterbalanced and reach trucks

The forklift truck operator can see to the front even when transporting large-volume loads, increasing safety on driving, loading processes and setting down loads. The SmartFork® Camera can be perfectly combined with SmartFork® Laser.

The special high-quality camera is integrated into the fork tip. A guard plate protects the camera. **Tip thickness is 25 mm**, any taper can be realised. The camera lens has an angle of inclination of 0°.

The SmartFork® Camera can be perfectly combined with additional ancillary equipment:

- ▶ SmartFork® Laser: Projection of a line laser integrated in the fork tip onto the load and the load carrier for improved aiming

Note:  
The product is an assistance system  
and thus does not absolve the user from the  
obligation to exercise due care!! The illustrations  
only represent the basic principles and do not  
constitute a contractual  
entitlement.
